Hanwha Corporation E&C Div. Overview

Hanwha Corporation E&C Division has quickly become a global player by leveraging its extensive experience in construction projects and by applying its new technologies and subject matter expertise across commercial and residential buildings, infrastructure, complex development, and more.

Hanwha Corporation E&C Division is recognized for its ability to successfully complete large-scale and complex projects in the global market, such as building an entire city; constructing chemical plants in the Middle East and North Africa; and completing various real estate projects in the Americas. Through its recognized capabilities, Hanwha Corporation E&C Division will continue carrying out responsible business practices to contribute to social development in the global construction market.

Leading company in sustainable environmental business

Hanwha Corporation E&C Division is pursuing a sustainable future by strengthening the competitiveness of its environmental business.

Eco-friendly water treatment business and resource circulation business are the core growth engines for the future. We are laying the groundwork for sustainable development by carrying out large-scale environmental projects based on various new environmental technologies and patented technologies.

- Daejeon sewage treatment plant modernization project
- Tongbok public sewage treatment facility modernization project
- Cheonan sewage treatment plant modernization project
- Yongin Respia Sewage Treatment Facility

Leader in complex development projects

Transcending traditional buildings, Hanwha Corporation E&C Div. connects with customer needs and creates new spaces.

Hanwha Corporation E&C Div. has an outstanding experience and expertise in complex development projects, covering residential, cultural, leisure, and commercial facilities.

- Suwon Convention Center MICE Complex
- Seoul Station Northern Area Development
- Daejeon Station Area Development
- Suseo Station Transfer Center Development
- Jamsil MICE Complex

Specialist in Cutting-Edge and Specialized Architecture

Hanwha Corporation E&C Division is demonstrating leading technology in cutting-edge and specialized fields such as data centers and arenas.

Hanwha Corporation E&C Division worked on numerous high-tech data center projects, including the hyper-scale Changwon IDC development project. In addition, Hanwha Corporation E&C Division has built Inspire Arena, Seoul Arena, and Philippines Arena, making us the only construction company to have both domestic and overseas arena performance.

- Changwon IDC development project
- Ansan Kakao Data Center
- Inspire Arena
- Changdong Seoul Arena

Specialist in new city development

Hanwha Corporation E&C Div. is an expert in new city development, with a diverse portfolio of experiences.

The Bismayah New City project in Iraq is a large-scale project where Hanwha Corporation E&C Div. has undertaken the entire process from design to construction. Leveraging its broad experience in new city development, including projects such as Incheon Eco Metro and Daejeon Techno Valley, the company actively fosters new city development in the Middle East and Southeast Asia regions.

- Bismayah New City in Iraq
- Incheon Eco Metro New City
- Daejeon Techno Valley (DTV)

Hanwha Corporation E&C Div.

History

Hanwha Corporation E&C Div. is making history through innovation and the spirit of continuous challenge.

1960-80

- **1967**
Founded Pacific Engineering & Construction
- **1976**
Obtained International Contractor certification
- **1979**
Completed Seosomun Building
Completed Jamsil Arena
- **1988**
Renamed Duksan Civil Engineering & Construction Co.
- **1989**
Completed Hanwha Chemical HDPE plant

1990-

- **1991**
Obtained International Contractor certification
- **1993**
Completed Yecheon NCC Plant
- **1996**
Company acquired by Hanwha Corp.

2000-

- **2002**
Hanwha E&C spin off from Hanwha Corp.
- **2003**
Received Korean Bronze Tower Industrial Medal
- **2005**
Completed Galleria Palace
- **2008**
Received the first eco-technology license for Domestic Membrane Water treatment
- **2009**
Developed the Building on an Integrated Photovoltaic System(BIPV)

2010-

- **2010**
Completed Incheon Eco Metro
Completed Gyeongin Expressway
Completed Cheongnyangni Station Complex
- **2011**
Completed Seoul Forest Galleria Foret
Completed Ministry of Knowledge Economy New Technology accreditation
Joined the One Trillion Won Club in winning public project orders
